

Satellite Radio has been such a major benefit in my life. I would like to express my opinion about XM Satellite Radio. I am stuck in a desk all day. Satellite radio helps me to keep in touch with news all over the country. Whether it is financial news, political information, current weather conditions, religious stations or interesting information such as Discovery, I feel like there is a world out there that I am in touch with using satellite radio. The quality and clarity is so much better than regular radio. The variety of music is so much more than just listening to the same songs over and over on a local station. If you tire of one kind of music, then you have a variety of other choices of music to choose. I respectfully urge you to not allow censoring of the Weather and Traffic channels, because further censoring may follow for the other channels. Please allow competition so that we have a better quality product available instead of censorship.
